## INTERIM RECONCILIATION BULLETIN 05-01

TOPIC: FY05 Interim Reconciliation Bu	lletin ISSUE DATE: 9/28/04
AUTHORIZED BY: Cheryl Thompson, Financi	al Manager PAGE 1 OF 4

## Background

The Department of Health and Family Services is required to conduct periodic reconciliations of fiscal data with the Department of Administration. To facilitate this overall process, the Bureau of Fiscal Services attempts to control the data entered into the Fiscal Management System and the Department of Administration System.

## Procedures

To control the entry of data into both accounting systems <u>for the quarterly</u> interim reconciliation, please review the attached schedule to this communication. Special attention should be directed to the following areas:

Keying Cutoff Dates Submission of Deposit Vouchers and CR Preparation Submission and Approval of Journal Vouchers.

BFS releases interface documents to DOA the day after they are keyed. They appear on the WiSMART suspense file and are part of the respective reconciliation. Once BFS receives the material from the organizations, approvals are applied in WiSMART and checks are received for mailing. The sooner the materials are received from the organizations, the sooner checks will be mailed. DMT-188's and related data should be submitted PROMPTLY.

Online keying cut-off date.  No entry may remain on hold at close of business on this date. Applies to delegated and BFS keyers.  Last day to enter documents into FMS for each respective reconciliation.  To match data keyed into FMS, entries can be made into WiSMART on the last working day of the month.  To match data keyed into FMS, entries can be made into WiSMART on the last working day of the month.  RE, RM, and WO, ARS documents, can be entered into WiSMART on last working day, as they are not entered into FMS and will not affect reconciliation between DHFS/DOA.  During reconciliation periods, those who prepare documents must pay special attention to the fact that no documents are submitted which include invalid account distributions, since the time required to validate the account distributions, since the time required to validate the account distributions may prevent the entire document from processing before cut-off.
